Udemy
- The Complete React.JS Course- Basic to Advanced [2023]

Laravel and in back end, create database, tables, insert, update, delete, merge and join tables.

- Work in a team setting in relation to design and development a new functional website for Edutams (edutams.net) limited with HTML, CSS, Bootstrap, JQuery, Javascript, vue js.

- Contributed to the development of features for Education Portal (edutams.net) platform in Ogun state under the ministry of Education, incorporating user feedback and continuously improving the user experience.

- Collaborated with a team of developers and educators to design and develop educational modules for Education Portal (edutams.net).

- Took ownership of creating a module from start to finish, including building a comment bank, scheme of work, Live Class, quiz modules etc., ensuring content accuracy, and testing for functionality.

- Worked on improving and maintaining existing modules, ensuring compatibility with new technologies and standards.

❖ Freelance Software Development Projects

▪ Ecommerce Application

- Developed a dynamic and user-friendly ecommerce application using a modern tech stack.
- Utilized React.js for building interactive user interfaces, enhancing user experience, and ensuring efficient front-end functionality.

- Implemented Redux for state management, allowing seamless data flow and maintaining application consistency.
- Leveraged Laravel, a robust PHP framework, to build a secure and scalable back-end architecture.
- Integrated payment gateways, user authentication, and order processing to ensure a complete shopping experience.
- Collaborated with cross-functional teams, including designers and backend developers, to ensure seamless integration of front-end and back-end components.
- Optimized application performance and responsiveness, resulting in improved loading times and enhanced user satisfaction.
- Conducted regular code reviews, identified areas for improvement, and implemented best practices for maintainable and clean code.
- Successfully delivered the ecommerce application, meeting project deadlines and exceeding client expectations.

- **Ongoing "Church Website"(**gracedefinitionchurch.com**)**

- Implemented React.js to create dynamic and interactive components that enhanced user engagement and navigation.
- Utilized Redux for efficient state management, ensuring seamless data sharing between different parts of the application.
- Collaborated closely with design teams to translate visual concepts into responsive and visually appealing web interfaces.
- Integrated Laravel on the backend to manage content, user authentication, and data retrieval, creating a seamless end-to-end experience.
- Customized and optimized website performance, resulting in improved loading times and better user satisfaction.
- Worked closely with stakeholders to gather requirements, iterate on designs, and implement features that aligned with the church's mission and goals.
- Ensured cross-browser compatibility and responsive design, providing a consistent experience across various devices.
- Employed modern development practices such as version control, code reviews, and continuous integration to maintain code quality and project efficiency.
- Successfully launched the church website, contributing to increased online engagement and enhanced communication within the congregation.

- **Ongoing Project**

- Currently working on a multi-vendor E-commerce website using blade, Vue.Js, Inertia.Js for the front-end and PHP Laravel for the backend (ongoing). This website is structured to have Super-admin, Admin, Sub-admins and Vendors and Users.

Reference

- On Request.
